

## **Bern, Switzerland – Feb 2019**

The main topics we discussed were:

### **RRDG Mission/Aims**

- Discussed this a little bit. Patrick and Neal to make a first pitch.

### **Communication Work Group**

- Also some discussion here, what the main aim should be
  - More members (especially registrars)
  - More adoption of the output of
- More usecases and examples of usage are likely needed to get more involvement. To think about how we can add these to the website and communication.
- Not yet planned to start, for sure need website finished first.

### **Low Content Definitions**

- General agreement that most of the work has been done on this.
- Will start mini WG on topic after Registration Metrics finalised (As likely need those same people)

### **Updates from Data Sharing Working Group**

- Making some good progress.
- set scope and aim
- Looking at MVP to share over next weeks

### **Updates from Registration Metrics WG**

- First set of Metrics finalised (lots of great debate at meeting in Bern)
- Will publish in the next weeks.

### **Mid-year RRDG face-to-face Meeting**

- whether it is needed between Bern and Meeting at CENTR Registrar Day?
- General feedback, nice to have, not absolute necessity. Idea to try and add mini workgroup meeting (this was very successful in Bern with two sub working group meetings either side of RRDG meeting)
  - CENTR Jamboree 27-29 May, could be a good slot as many RRDG members are already heading there. I will set a Doodle to get some idea of attendance.
